

B.Sc. Chemistry

PROGRAM SPECIFIC OUTCOME

1. To understand the basic facts and concepts in chemistry.
2. To develop the ability to apply the principles of chemistry
3. To appreciate the achievements in chemistry.
4. To know the role of chemistry in nature and in society.
5. To develop problem solving skills.
6. To be familiarized with the emerging areas of chemistry and their applications in various spheres of chemical sciences and to apprise the students of its relevance in future studies.
7. To develop skills in proper handling of apparatus and chemicals.
8. To publish various articles and documents in chemistry related books.
9. Develop hands-on experience.
10. Perform experiments and interpret results obtained.
