MULTIDISCIPLINARY ADD-ON COURSE
WEB DESIGNING USING JOOMLA CMS
Conducted for UG Students

Academic Year: 2019-20

Joomla is a multidisciplinary add-on course offered by Department of Commerce (SF). The duration of the course is 3 Months (30 hours). Joomla is web content management system software that is free and open-source to use. It was developed by Open-Source Matters Inc. and Joomla Community developers. It was purely written in PHP programming language. It was initially released in the year 2005 and was licensed under GNU General Public License. It is based on the MVC design model framework. It supports different cross-platform operating systems. The several features of this Joomla open-source software are – it supports multiple languages of more than 70 across the globe, Search Engine Optimization feature, extensions support, user and menu management including cache management, flexible to use, and also free to use. It also contains built-in SEO tools.

Joomla is generally used for web content publishing for rich articles. It can also be run on the LAMP stack to publish the web content frequently. It can also be installed on the Microsoft web platform. Joomla has also a large community that holds conferences every year. It has also a support of many extensions. This course would add value to the learner's profession and also benefits a lot which includes course certifications.

Joomla course is one of the free open-source software to organize, build, manage and publish web content, blogs, intranet, and mobile applications. It is one of the content management systems (CMS) software for publishing web content. The main goal of this course is to provide students or professionals a complete guide from beginners to advanced concepts related to Joomla

27 students were registered for the course and successfully completed the course. Resource Person who engaged in the classes has distinguished experts from their respective topics. Interested UG students of Deva Matha College can enter this course.
