INDUSTRIAL VISIT

Industrial Visit

Experiential Learning

Experiential learning is an engaged learning process whereby students “learn by doing” and by reflecting on the experience. Experiential learning activities can include hands-on laboratory experiments, internships, practicums, field exercises, study abroad, undergraduate research and studio performances. Well-planned, supervised and assessed experiential learning programs can stimulate academic inquiry by promoting interdisciplinary learning, civic engagement, career development, cultural awareness, leadership, and other professional and intellectual skills.

Experiences are carefully chosen for their learning potential. Throughout the experiential learning process, the learner is actively engaged in posing questions, investigating, experimenting, being curious, solving problems, assuming responsibility, being creative, and constructing meaning, and is challenged to take initiative, make decisions and be accountable for results. Reflection on learning during and after one’s experiences is an integral component of the learning process. This reflection leads to analysis, critical thinking, and synthesis. Learners are engaged intellectually, emotionally, socially, and/or physically, which produces a perception that the learning task is authentic. Relationships are developed and nurtured: learner to self, learner to others, and learner to the world at large.

The form of experiential learning that we undertake is Field Trip/Industrial Visit. Supervised student research or practice is carried out away from the institution and in direct contact with the people, or other entities being studied. Field work is especially frequent in fields including industrial work and environmental studies. Going on a field trip enhances their critical thinking skills and gives students a chance to think about a topic or theme from a different perspective. Giving equal weightage to both indoor as well as outdoor activities is what will make students well prepared for what lies outside in the real world. Field trips allow students direct access to tools and environments that they otherwise wouldn’t have contact within the four walls of their college. Each experience solidifies learning and supports key academic theories. They begin to see that what they learn in the classroom can help them solve real world problems and this shapes them as people.

INDUSTRIAL VISIT

Industrial Visit

Academic year	:	2022-2023
Date(s) on which program conducted	:	11 August 2022
Collaborating agency inside or outside the institute	:	Nil
Beneficiaries	:	II & III BA ENGLISH TRIPLE MAIN STUDENTS
Number of teachers coordinated the program	:	Six
Number of students participated in the program	:	Forty Eight

A brief report on program

Industrial visit for the students of second and third year students was conducted on 11 August 2022. Accompanied by HOD and five teachers, forty eight students took part in the visit. The team visited office of Deepika Daily at Kottayam in the morning. The students attended a talk by Rev. Fr. Mathew Chandrankunnel, managing director of the daily and interacted with Rev. Fr. James Kudilil, Chief Editor. They got an opportunity to view the various technical aspects including the printing of the newspaper.

In the afternoon the team visited Media Village at Changanacherry. There also the students were exposed to the working of multimedia and its pre and post production.

The primary aim of the programme was to ensure for the students the practical aspects involved with journalism
