Feedback Analysis

The Analysis of the feedback on curriculum and its delivery shows that the majority of students have a positive opinion towards the curriculum followed by the institution, its competency, and delivery. But more than 50% of students remain unsatisfied with the lack of time for exam preparation and the lack of timeliness in the publication of results. During the Covid-19 pandemic, exams could not be held on time and as per the schedule and there was delay in the publication of results which may have resulted in such a response.
